

Informed Consent for the Project

"EEG and EMG Recording during Upper Limb Movements"

Date of recording:

By means of this document, I state that my participation in the project entitled "*EEG and EMG Recording during Upper Limb Movements*" is voluntary. I understand that my participation will consist of attending sessions where electroencephalography and electromyography recordings will be carried out using two different devices while I perform a series of tasks established at the beginning of the test.

I have been informed that the electroencephalography and electromyography recordings are non-invasive, which means that no harm will be caused to my physical or emotional health. In addition, I have been informed that the information resulting from my participation will be used solely for research purposes. I understand that my personal information will remain confidential and that the data collected during my participation in the study will be shared for the creation and publication of a database.

This consent does not release the researchers from their ethical responsibility towards me. I understand that I have the right to withdraw my consent at any time without consequences for me. In addition, I have had the opportunity to ask questions about the study and about my participation in it, and all my questions have been answered satisfactorily. In case I require further information, I have been provided with the email address of the doctor responsible for the project.

In case you feel that your rights have been violated, you may contact Dr. Gwendolyne Peraza Mercado and/or Dr. Fany Thelma Solís Rodríguez, President and Secretary of the Research Ethics Committee of UACJ, at the emails: presidente.cei@uacj.mx and secretaria.cei@uacj.mx.
